

Summer Semester 2024

Lecture Series in the Focal Point Programme 'Biochemistry of Stem Cells'

This module is part of the "Stem Cell Lecture Series" in the study programme "Molecular and Developmental Stem Cell Biology"

Fridays in HMA 40
starting at 01:15 pm (90 minutes)

12.04.: ---

19.04.: R. Heumann: "Intracellular signalling in stem cells"

26.04.: B. Brand-Saberi: "Muscle stem cells and myogenesis"

03.05.: L. Dehmelt: "Mechanosensation in stem cell differentiation"

10.05.: ---

17.05.: T. Dittmar: "Cell migration in cancer"

24.05.: Rub Holidays (20.-25.05.2024)

31.05.: ---

07.06.: S. Wiese: "Epigenetics – changes of histone acetylation and DNA methylation over lifetime"

14.06.: A. Faissner: "Molecular structure and function of the stem cell niche"

21.06.: B. Thakur / J. Ghanam: "Extracellular vesicles as a novel biomarker in monitoring clonal evolution of cancer stem cells"

28.06.: U. Kindler: "Satellite Cells in Duchenne Muscular Dystrophy"

05.07.: H. Zähres: "Induction of pluripotent stem cells"

12.07.: ---

19.07.: ---

29.07.: Exam from 09:00 am, Room HMA 30

06.09.: Retake Exam from 09:00 am, Room HMA 30
